

DAVID LATOUCHE

After several years studying and working at various arts and crafts at various schools and businesses, David LaTouche first began making mounts in the late 1970's as an installer in the Objects Conservation department at the Metropolitan Museum of Art. A few years later, he co-founded Benchmark in 1980. They have been providing mountmaking and installation services since then and have been happy to be able to work on many wonderful things. Later they began occasionally offering intensive mountmaking seminars at our workshop and in London. In 1991 their development of the Butterfly Bookmount and other products led them to start the Benchmark Catalog that now provides a range of tested products that they think useful to exhibitions.
